

## BRECKENRIDGE NEWS.

WEDNESDAY, OCTOBER 18, 1893.

## The Lone Fisherman.

He's a lonesome fisherman, an' don't like to give a rap. About any kind o' business, or about the growin' crop. But you might see him waddlin' on the river bank, so snug. When the fish is in the water, an' the bait is in the jug.

He stretches out an' gives a grunt of feelin' that's free from pain. An' wonders why the rest o' the world is all at after gain. When they could be settin' there with him, on nature's grassy rug. With the fishes in the water, an' the bait still in the jug.

After a while he raises up, an' heartily looks about. Then draws it gently to him, an' pulls the corn-cob supper out. When he shakes it up an' down, till he hears the stuff go kee-king. For the fish is in the water, an' the bait is in the jug.

But when the sun's a-sinkin', an' the katydids commence. His pathway home looks like the track of an old, worn-out rail fence. For he's feelin' powerful heavy, an' it gits to be a lull. When the fish is in the water, but the bait isn't in the jug.

E. N. WOOD.

## A Good Thing to Keep at Hand.

From the Troy (Kansas) Chief.

Some years ago we were very much subject to severe spells of cholera morbus; and now when we feel any of the symptoms that usually proceed that ailment, such as sickness at the stomach, diarrhoea, etc., we become scared. We have found Chamberlain's Colic, Cholera and Diarrhoea Remedy the very thing to straighten one out in such cases, and always kept it about. We are not writing this for a pay testimonial, but to let our readers know what is a good thing to keep handy in the house. For sale by A. R. Fisher, Gloverport, and Witt & Meador, Hardinsburg.

## The Effect of Free Coinage.

We print elsewhere a communication from Mr. J. H. Etheridge, of Eden House, N. C., which touches on a very interesting subject, namely, the effect that the free coinage of silver would have on the prices of products and the prosperity of the country. In the first place, our correspondent perceives that the banks now have it in their power to congest the currency of the country in the money centers, and, naturally enough, he wants to know how the free and unlimited coinage of silver would increase the per capita of circulation in the south and make a more uniform circulation.

In this way: The most of the mints are open to the free coinage of silver that money would become a money standard and such as the Democratic platform declares for. The unlimited demand for silver bullion at the mint would carry the money value of the coin into the uncoined metal, for no holder of bullion would accept a less price than the amount of legal tender money he could exchange it for at the mint. The currency basis of the country would be doubled. In other words, the restoration of silver to its old place in our monetary system would enable the government (or the banks) to double, with entire safety, the amount of paper currency now in circulation. That which we now have rests entirely on a gold basis, and that, as was shown in the recent exportation of the yellow metal, is a precarious basis. It is a basis that is constantly increasing in value, as is shown in the fact that those who are compelled to go into the market to buy money to pay their debts find year by year that \$100 commands a larger amount of their produce. In 1873 a farmer could buy 100 debt-paying dollars with one bale of cotton. In 1893 he finds that he is compelled to bring three bales to market in order to buy 100 debt-paying dollars. Making due allowances for all other conditions and circumstances, he is compelled to conclude either that the value of his labor has undergone a shrinkage of 150 per cent. or that the purchasing power of the debt-paying dollar, redeemable in gold, has increased 150 per cent.

As we have said, the gold basis is a narrow and a precarious one, and it is constantly growing narrower and more precarious as compared with the growing demands of commerce and business and the increase of population. To restore silver to its old place as a money standard in this country will more than double the money basis and will enable us to more than double the volume of currency redeemable in hard money. That will be the first benefit of free coinage.

Our currency being no longer redeemable solely in gold, can be expanded to meet the demands of trade and business. It will cease to be a dear currency in the sense that it commands a higher rate of interest, and when this happens the banks and the speculators will not find it profitable to congest it in the money centers. Money will be cheap in the sense that the returns from it will be larger when invested in business enterprises than when loaned "on call" or on short time.

Our currency system is in such a state of contraction as compared to the volume of business and the demands of the market that when there is a pinch in the market or a scare of any sort, the banks lock it up, and use among themselves a currency to which they give the name of clearing house certificates. The objections which the banks and the money lenders have to the free coinage of silver is not that it would give us an unsound currency, but that it would put an end to contraction and prevent congestion in the money centers. There will always be a larger supply of currency in the money centers than in the agricultural regions; the demand there is larger; but when the money basis is more than doubled, there will be enough to go round, and each section will have the proportion that the demand justifies.

When the money basis is scarce and dear the currency that represents it is scarce and dear. Prices bear pretty much the same relation to the condition of the currency that the thermometer bears to the condition of the weather. When money is plentiful prices are high enough to stimulate all forms of industry and all kinds of business.

When money is so plentiful that the greater part of it cannot be employed in speculative call loans, it will then seek investment in business and industrial enterprises; the labor power that is now going to waste will be utilized, and the farmers will be able to get remunerative prices for their crops. We may recur to this subject again, but our correspondent can carry out this line of reasoning for himself.—Atlanta Constitution.

## Dr. Hale's Household Ointment

Is the finest remedy in the world. It absolutely cures catarrh. It cures Neuralgia and Rheumatism. Cures Piles like magic. Cures salt rheum in the most soothing manner. Cures inflamed and Granulated Eyelids. Cures Coughs and Colds. Can be taken internally. A positive specific for Pneumonia. Cuts, Bruises, Burns, Chilblains, Sores of long standing. Corns and bunions are cured quickly; different from all else; superior to all else; it has no equal. 25c. and 50c. boxes. Large size cheap. Sold at Short & Haynes' drug store.

## Getting Toned Up.

There was a fakir with an electrical machine on wheels in the public square at Chattanooga. Any one wanting his system toned up had only to land him a nickel and grasp the handles attached to the battery. Business was growing a little slack when an old darky couple—man and wife—came along and paused to see and hear. After three or four minutes the husband turned and said: "Linda, I've gwine to git my system toned up."

"Shoo, now, Moses! Doan' yo' dun go foolin' around 'bout yo' sistem. Yo' sistem's all right."

"I've feelin' powerful bad jes now, Linda. Reckon it might take dat feelin' o' goneness away."

"I've a tellin' yo' not to fool wid dat ar masheen, Moses!" she vigorously replied. "Mebbe it's good far de system, an' mebbe it'll knock you frew the mid dle of next week! You's too ole to take chances Moses!"

"Keep quiet, honey. Reckon I know what's fur de best. Hold dis washb'd while I git toned up."

He passed over his nickel and seized the handles. It was one of those batteries which hangs on to a man until the current is shut off, and the longer it hangs the stronger the current becomes. The old man had got about enough, and his back was arched up and his feet spread apart, when two dogs began fighting a few yards away. The crowd made a rush and the old man at the handles was forgotten until he began yelling at the top of his voice. As soon as the current was turned off he dropped in a heap. We carried him to the walk and laid him on his back and threw water in his face, and after three or four minutes he opened his eyes and gasped out:

"Dat—dat yo' Linda?"

"Yes, dat's I!" she sternly replied.

"An' what's dun got de mattah wid me?"

"De mattah wid yo', Moses? De mattah wid yo'? Why yo' dun saw a brass bar'l on wheels, an' yo' paid 5 cents to git yo' sistem toned up by takin' hold of the handles. Yo's got de tone! Yo' mo'f is all drawn around on yo'r shoulder, dat left eye is all cocked up an' a boaf yo'r knees an' wobbles like rabbit in a brush fence. Git up, ole man—git up an' come along an' bring dat tone wid yo', an' be dun glad yo' hain't an ole fool nigger no mo'! Yo's bin toned, an' yo's jes like a white gem'an now!"—Ex.

## She Was Too Lazy

To steep up herbs and so she tried pills and cathartics till she was sallow and bilious as an opium eater. Then she took a friend's advice began using Parks' Tea. Now she is fresh and blooming "as a daisy." A. R. Fisher, druggist.

## Movements and Doings of People in Neighboring Towns.

[Hawesville Plaindealer.]

There is not a vacant house in town, or an idle man because he can't get work.

Col. S. F. Brown is visiting relatives and going against the games at the World's Fair.

Miss Kate Jackson and the Captain were the happiest people in Owensboro Friday and Saturday.

The home of Morris Gates in Cannibon was destroyed by fire yesterday morning. The furniture was saved.

J. P. M. Jett, John Mennet, Mark Estes and L. S. Powers are the men appointed by Collector Powers in the revenue service from this county.

Rev. W. C. Hayes preached his farewell sermon at the Methodist church, Sunday night. He left for Bardonia Tuesday. His successor, Rev. Brandon, moved his household goods to Hawesville Monday.

Rev. J. J. Wolf and Elder Joe Hopper closed a successful meeting at the Presbyterian church Sunday night. There were five additions to the church and six confessions of faith. In addition to this there was a general revival among the church members of Hawesville.

The court of claims met Tuesday, Judge Taber presiding, and all the magistrates on the bench. That body went to work with a will and business was dispatched at an unprecedented rate. No snipe bills were allowed, and every member seemed to work entirely to the interest of the county.

An item has been going the rounds which states that a girl in New Jersey kneads bread with her gloves on. A country editor remarks that he needs it with his shoes on, and his pants on, and that he will need it without shoes or pants on if some of his delinquent subscribers do not settle for their paper.

Little vegetable health producers: DeWitt's Little Early Risers cure malarious disorders and regulate the stomach and bowels, which prevents headache and dizziness. A. R. Fisher, Gloverport, and Witt & Meador, Hardinsburg.

## MONTHLY CROP REPORT

Of Commissioner of Agriculture, Labor and Statistics.

FRANKFORT, KY., Oct. 6, 1893.

The rain which commenced on the last day of September has been general all over the State. In some parts of the State there has not been rain to do any good since the last week in June. All kinds of grass was completely burned up and stock water getting very scarce. The farmers had begun to feed their stock on fodder and hay. In some localities they had a rain on September 9th, which will make a great change in late tobacco and late corn, and unless we have an early frost the condition of the crop will be materially changed. I have no report from any of my correspondents of damage done by the frost of September 17th.

## TOBACCO.

The larger part of the tobacco crop is housed. The rains in the last few days caught a great deal that was cut but not housed, and for fear of frost a great deal of green tobacco has been cut. A marked improvement in condition this month over last, but the crop is reported by many correspondents as being prematurely ripened and of an inferior quality. Per cent. 73.

## CORN.

The corn crop has made a change of eight or ten points since last month. The general opinion has been that there would be about two-thirds of a crop. It remains to be seen whether or not too much improvement is based on the late rains. Much depends on late frosts as to the outcome of the late corn. The early corn has mostly been cut and much of it has cured up light and chaffy. Per cent. 67.

## WHEAT.

Wheat sowing will advance more rapidly since the rain. The farmers are very backward with this crop, and the indications are that the acreage will not be so large.

## GRASSES.

Should the weather continue favorable fall grasses will be all that could be desired. In many places where there was rain in September the grass is now very fine.

## STOCK.

The condition of stock—horses, mules, cattle and hogs—is reported good everywhere. No complaint of any kind except of hog cholera. In one of my reports last fall, I said to the farmers that there was a very great shortage in the hog crop, and from all the information I can get the supply will be fully as short this fall. I failed this month to ask the per cent. of hogs in our State, but will give it in some of the hog growing States: Illinois, 83 per cent.; Iowa, 82 per cent.; Kansas, 78 per cent. This time last year the per cent. in Kentucky was about 75. If these statements prove to be correct, it means high prices for hogs this fall and winter.

NICHOLAS McDOWELL, Commissioner.

One word describes it—"perfection." We refer to DeWitt's Witch Hazel Salve, cures obstinate sores, burns, skin diseases and is a well known cure for piles. A. R. Fisher, Gloverport, and Witt & Meador, Hardinsburg.

## Property Rights of Married Women.

According to a new law which went into effect last week the property rights of married women are greatly enlarged. Formerly a married woman could not dispose of her property by will unless with the consent of her husband, but now she may make a will whether he objects or not. The new law also gives her control of her real estate. That portion of it is as follows:

"Marriage shall not give to the husband, during the life of his wife, any estate or interest in her real estate, including chattels real, owned at the time of marriage. Such real estate, the right thereof, or chattels real, shall not be liable for any debt or responsibility of his contracted or incurred before or after marriage, but shall be for her debts and responsibilities contracted or incurred before marriage, and for such contracted after marriage on account of necessities for herself or any member of her family her husband included, as shall be evidenced by writing signed by her."

The husband's contingent right of courtesy or life estate shall not be sold for, or otherwise subjected to, the payment of any separate debt or responsibility of his during her life. A conveyance of real estate by a married woman to be effectual must be executed in conformity to existing laws, and a married woman, if she be of sound mind and twenty-five years of age, and not unduly influenced thereto, may dispose of her estate by last will and testament, and she shall also have the power and right to rent out her real estate and collect, receive and recover in her name the rents thereof.—Winchester Democrat.

Two Assignments. Mr. E. Miller, who has been engaged in merchandising at Prentiss, this county make an assignment Saturday for the benefit of his creditors. Mr. J. B. Wilson was made assignee and no statement of assets and liabilities was filed, but they will be about equal and range somewhere about \$3,000. Bad collections led up to the failure.

Dairy and Stock. A fall calf can be raised without great expense and made a fine animal ready to go out to grass and do well next spring. If you haven't milk for her give her hay tea and oil meal gruel. Teach her early to eat fine, sweet hay.

There is no better way to preserve butter than by working out all the butter-milk and moisture, salting it at the rate of one ounce per pound and packing closely in jars or tubs, keeping the butter in a clean cellar or low and even temperature.

The value of whole grain for colts has been compared with ground grain by the Iowa Experiment Station and fine feed proved most productive of growth. Both received the same weight. It was composed of oats, shelled corn, barley, bran and linseed meal. The feeding of separator milk was also highly commended.

Grain for farm animals should never be ground fine. When fine it is apt to form into masses in the stomach, very difficult of digestion. The formation of

Ten Thousand Tongues will Tell you that no other House Ever Did, Ever Will or Ever Can Sell the Same Perfect Goods for the Same Low Prices as Kleinhans & Simonson Sell Them.

LOUISVILLE'S GREATEST STORE

THE MAMMOTH SOUNDS THE KEY-NOTE

OF ITS

GREAT AUTUMN CAMPAIGN.

\$1,000 IN GOLD TO OUR CUSTOMERS.

We share our profits with our customers every year. This year we have had made for us a number of Yale keys to give to our customers, and a heavy plate glass and steel money box. In this money box we shall place \$25 IN GOLD every Thursday morning. Among the keys given out each week, will be one that will unlock the box and secure the \$25 for the person holding the key. With every purchase in every department, the customer receives one of these keys and the one whose key opens the box will take out the contents as a free gift. Every holder of a key may try it in the lock of the money box each Wednesday between the hours of 8 a. m. and 7 p. m.

Country customers may send their keys by mail and we will try them for them and send the \$25 to them if their key unlocks the box. Send for Catalogue and order by mail. Charles Arnold, of Bardonia, got the first \$25.

WE SHARE OUR PROFITS WITH THE PEOPLE.

## OVERCOATS.

Beautifully fitting Meltons, in every desirable color, Black Chevrons; former prices \$12 to \$14; our price now \$10.

The King of Kerseys, excellently well made; former prices \$15 to \$16; our price now \$12.

Gracefully made Kersey Overcoats, both regular and extra length; former prices \$18 to \$20; our price now \$15.

The ever popular English Kersey; former prices \$20 to \$22; our price now \$18.

## CHILDREN'S CLOTHING.

Our stock of Clothing for Children and Boys is the Largest and Loveliest and Prices the Lowest on the Continent.

Our Great COMBINATION SUITS for the little fellows are the talk of the State. They are matchlessly made of perfect material, with double seals and knees and seams, and an extra pair of Pants and a hat go with every Suit. The best values for \$5 mothers ever saw or dreamed of.

Shoes for the family at one-third less than you pay at other stores. Hats for Men, Boys and Children at the lowest prices on earth. Our display of Furnishings, Gloves and Umbrellas unsurpassed. Send for illustrated catalogue.

## Homely Wrinkles.

Do not complain of your wife's extravagance with a cigar in your mouth.

After washing a wooden bowl, dry it at a distance from the stove, so that it may not warp or crack.

Ivory black stirred in ordinary shellac varnish makes a brilliant black varnish for iron fireplaces.

Light scorch marks may be removed by simply moistening them with water and laying in the sun.

When buying new furniture, remember the labor of dusting, and do not be tempted to buy elaborate carving.

Corks may be made air and waterproof by keeping them immersed for five minutes in melted paraffine.

People who are so rich they can buy anything they want, have nothing left to wish for; not an enviable state.

Do not double the blankets at the head when making a bed; bring them just up to the chin, then fold over them a liberal allowance of sheet.

When dusting a room containing many ornaments begin in one corner and go regularly around, dusting walls, washboards and bric-a-brac till you come to the same corner, then you will know when you're done.

A good cement for broken china: Make a very thick solution of gum Arabic and stir into it plaster of Paris until a thick paste. Apply with a brush to the fractured edges of the chinaware and stick them together.

When picking the chickens this fall save some of the otherwise waste feathers to put into the early nests next spring to make them soft and warm.

You can sprinkle with them a little chaff or fine hay to hold them in place. Put a layer of straw under them, of course.

Late in the green corn season when it is too mature for boiling it may still be acceptable cooked thus: Cut down through the middle of each row of grains and with the back of the knife scrape and force out the tender part of the kernels. Put these in a thick saucepan with plenty of butter, salt and pepper, and just enough cream or milk to cover them and stew gently for ten or fifteen minutes, only until they seem juicy and tender, then serve hot.

## Two Assignments.

Mr. E. Miller, who has been engaged in merchandising at Prentiss, this county make an assignment Saturday for the benefit of his creditors. Mr. J. B. Wilson was made assignee and no statement of assets and liabilities was filed, but they will be about equal and range somewhere about \$3,000. Bad collections led up to the failure.

## Dairy and Stock.

A fall calf can be raised without great expense and made a fine animal ready to go out to grass and do well next spring. If you haven't milk for her give her hay tea and oil meal gruel. Teach her early to eat fine, sweet hay.

There is no better way to preserve butter than by working out all the butter-milk and moisture, salting it at the rate of one ounce per pound and packing closely in jars or tubs, keeping the butter in a clean cellar or low and even temperature.

The value of whole grain for colts has been compared with ground grain by the Iowa Experiment Station and fine feed proved most productive of growth. Both received the same weight. It was composed of oats, shelled corn, barley, bran and linseed meal. The feeding of separator milk was also highly commended.

Grain for farm animals should never be ground fine. When fine it is apt to form into masses in the stomach, very difficult of digestion. The formation of

these masses is further avoided by feeding the meal mixed with the stover, preferably cut into bits not longer than two inches and dampened enough to make the meal adhere.

Working butter too much, or when too cold, breaks the grain and gives it a salty appearance that lessens its market value. Such butter loses flavor and becomes rancid sooner than butter worked or washed only enough to rid it of butter milk and at a temperature that will preserve its waxen appearance and good flavor.

Are you going to winter some of the fall pigs? It will pay to let them stop growing. Fix up their house and see that they are kept warm. Do not feed them on corn nibbles, nor on cornmeal, the same as you give hogs which are being fattened. Growing pigs must have something to grow on. There is wheat bran, middlings, milk and vegetables at this season of the year. If you do not have milk in abundance, make a slop of middlings, oil meal and water, feeding more grain than is needed when milk is used.

In computing the income from live stock we must consider what is put on the farm as well as what is sold off it; and in our practice stock growing we should consider that poor food makes poor manure. Starving the animal is starving the land. Food that fattens the animal makes manure that fattens the land. The manure from a certain weight of good clover hay is worth three times as much, from wheat bran six times as much, from oil cake meal nine times as much, from cotton seed meal twelve times as much, as the manure from the same weight of wheat straw.

A gentleman who has canvassed Breckenridge county pretty closely, says that the tobacco crop of that county is larger than last year and fully as good if not better in quality than last crop. Meade county has about same quantity as last year and it is fully as good.—Farmers Home Journal.

## CHOLERA!

FRESH OUTBREAK IN BERLIN. Alarm for Its Invasion of America Well Founded.

The telegraphic dispatches of January 21st report the outbreak of cholera anew, in Berlin, 63 cases and 19 deaths being reported.

Just now, when an epidemic of Asiatic cholera is among the alarming possibilities, all stomach and bowel troubles assume an importance beyond the ordinary, and should meet with prompt treatment. Cholera morbus, cholera infantum, diarrhoea, dysentery, flux, colic and cramps, wind on the stomach, flatulency, distress after eating, etc., all point conclusively to a bad condition of the stomach and bowels, and all such disorders should be corrected at once.

Mr. H. L. Wilson, Stumptown, Va., says: "Lightning Hot Drops is the best medicine I ever used for pains; for cramps and colic in children, it can't be beat. For flux, it is the king."

Mr. R. L. Blankinship, of Tooley, Va., has this to say: "Last April I had an extremely severe attack of diarrhoea; had twenty-one actions of my bowels in less than two hours. I took three doses of Lightning Hot Drops and it relieved me instantly."

Lightning Hot Drops is the safest, surest, quickest remedy ever compounded for each and all of the above complaints. Moreover, it cures all pains, external and internal, and is the best safeguard known to destroy the evil effects of a change of water or diet. Pleasant to take. Sweetened, children like it. Lightning Hot Drops is sold by all dealers in medicine, at 25c. and 50c. a bottle, on the guarantee: "No relief, no pay. Try it once. Be not deceived. Look for Trade-Mark of natives gathering herbs. Made only by Herb Medicine Co., Springfield, Ohio."
